SUMMARY

Lead Software Engineer with 7+ years building full-stack enterprise applications in .NET, C#, Web APIs and SQL on AWS and Azure. I lead and mentor developers, write clean, testable code, and put AI to work end to end: AI-assisted delivery at work, and Shui.AI, a voice agent for meetings that I designed and built solo.

TECHNICAL SKILLS

Languages	C#, HTML, CSS, JavaScript, SQL, LINQ, YAML, XML, JSON
Frameworks	.NET 6 - 10, ASP.NET Core MVC, Blazor, Razor, Web API, REST, SOAP, ADO.NET, Swagger
Cloud & DevOps	AWS, Azure AD, OpenID Connect, MS Graph API, Docker, Kubernetes, GitHub Actions, ArgoCD
Data	MS SQL Server (SSMS), PostgreSQL + pgvector, Stored Procedures, Snowflake, Oracle SQL, IBM DB2
AI & LLM	Claude Code & API, Microsoft.Extensions.AI, RAG, Ollama, GitHub Copilot, Gemini, prompt engineering
Architecture	Microservices, SOLID, Dependency Injection, Repository Pattern, Design Patterns, Agile/Scrum
Tools	Visual Studio, VS Code, Git, Postman, NuGet, Serilog, Playwright, Jira, Confluence, Okta, OAuth 2.0, IIS

WORK EXPERIENCE

Company: Neiman Marcus Global Technology Services Pvt Ltd (Formerly: Hudson's Bay Services Pvt Ltd)

Designation: *Lead Software Engineer*, *Store Applications* **September 2025 - Present**

- Key contributor to an $8M mainframe decommissioning initiative (1,500+ jobs, 50+ applications): personally migrated 25+ UC4/DB2 batch jobs and 6 applications to .NET 10, within a team owning 500 jobs and 12 applications.
- Architected and delivered a full-stack promotional card activation and returns platform web application (ASP.NET Core MVC) with Azure AD auth and Graph API roles, deployed across 40+ retail stores, processing thousands of transactions daily.
- Built AI-powered internal tools on the Claude API; AI-assisted development (Claude, Copilot, Gemini) cut delivery time by 50%.
- Automated data extract pipelines replacing mainframe jobs, cutting delivery from hours to under 5 minutes (JSON to S3).
- Engineered centralized secrets management via AWS Secrets Manager across 3 Kubernetes environments, eliminating hardcoded credentials and reducing config-related deployment failures by 90%.
- Mentored 3+ developers, established reusable .NET scaffolding patterns adopted across 4 console apps, and implemented CI/CD pipelines cutting deployment time from hours to under 15 minutes.

Designation: *Senior Software Engineer*, *Store Applications* **April 2024 - September 2025**

- Developed web applications and REST APIs using ASP.NET Core MVC, JavaScript, and Swagger for store operations.
- Integrated AWS S3 for secure file storage and optimized application performance through refactoring and query tuning.
- Drove test-driven development practices with unit, integration, and regression test suites.

Designation: *Software Engineer*, *Store Applications* **July 2020 - March 2024**

- Designed and developed a middleware environment to manage secure TLS handshakes, incorporating Okta user verification, Microsoft MFA, Akamai tokens, and cache keys for secure communication with external systems.
- Developed iOS apps for in-store iPads, enabling customers and associates to apply for in-house credit cards.

Company: Infolink Technologies Private Limited

Designation: *Software Engineer* **June 2019 - February 2020**

- Built a SaaS business management platform covering lead tracking, quotations, orders, and operational reporting.

PROJECTS

Shui.AI – AI teammate that joins your meetings | *Personal project, built solo* **2026 - Present**

- Built end-to-end in .NET 10 (ASP.NET Core MVC, Razor) an AI voice teammate that joins Google Meet calls, answers "Hey Shui" questions out loud with cited sources, catches latecomers up, and writes summaries, decisions and action items.
- Engineered RAG over a team's GitHub code, PRs, issues and docs: pgvector + Postgres full-text search with rank fusion, permission filtering inside the query, citation checks, and an audit log.
- Zero-cost stack: Microsoft.Extensions.AI over Ollama with automatic fallback across free Gemini/Groq models, Playwright meeting bot, Kokoro TTS, SearXNG, OIDC sign-in, Docker Compose, GitHub Actions CI, 80+ xUnit tests.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering – The Oxford College of Engineering, Bengaluru **2015 - 2019**
